

Cross-Sectional View

Side View of Lock Button

- **Triangular Shape** – Enables each section to lock in automatically. No twisting or turning required to lock. All sections are 100% tested as per American OSHA and ASTM F-711.
- **High Visibility** – Fluorescent tip section is highly visible and has a foam core.
- **Lock Buttons** – Size and design is such that operation is easy with or without gloves.
- **Versatile** – The rod can be adjusted to various lengths by simply depressing the lock buttons and sliding the bottom sections off until the desired length is reached.
- **Easy Disassembly** – No tools required, simply press the button and slide the sections off.
- **Ergonomic Design** – Triangular shape gives a better grip for use than conventional circular rods.
- **Simple Part Replacement** – All buttons and mechanisms identical.
- **Easy Maintenance** – Smooth glossy surface aids routine cleaning and waxing.
- **Base Cap** – Cushions and protects base end.
- **Strong Universal Head** – Aluminium alloy incorporating corona discharge design. Includes a captive Belleville washer to hold universal attachments securely.

Part Number	Extended Length	Retracted Length	Base Diameter	Weight
CLY 255 HV-220	6.43m	1.58m	44mm	2.92kg
CLY 255 HV-230	9.21m	1.68m	53mm	4.55kg
CLY 255 HV-240	12.00m	1.75m	60mm	6.5kg
