

# CLY 930 MS100xxx

## Insulated Torque Wrenches

### Data Sheet

The Clydesdale range of torque wrenches feature linear graduation with both metric and imperial units for accurate setting of the required torque. The aluminium alloy body provides an extremely light but robust tool designed for use in conjunction with our range of enlargers, reducers and sockets. Once the torque is set, the tool will automatically reset ready for the next nut or bolt. Torque wrenches are supplied with manufacturer's calibration certificate and are compliant with EN 60900, ESI 26-3, VDE 0680 and NFC 18-400 guaranteeing insulation up to 1000V.

Part Number	Drive Size	Reversible	Torque		Length	Weight
			Nm	Lbft		
<b>CLY 350 MS100N1A</b> 	1/2"	No. Clockwise tightening only.	8-54	5-40	315	850
<b>CLY 350 MS100N2</b> 	1/2"	No. Clockwise tightening only.	30-150	20-110	450	930
<b>CLY 350 MS100NO</b> 	3/8"	Yes. Rotate cap to reverse ratchet.	4-20	3-15	235	490
<b>CLY 350 MS100RN1</b> 	3/8"	Yes. Remove and flip drive to reverse.	8-54	5-40	315	850
<b>CLY 350 TW-38113</b> 	3/8"	Yes. Rotate cap to reverse ratchet.	11.3	8.3	235	490
