

CLY 555 xxxx
Leather Protectors for Rubber Insulating Glove
Data Sheet

Manufactured using the same former design as our range of Rubber Insulating Gloves and Latex Insulating Gloves, Clydesdale only sources the highest grades of leather for our over protector gloves. Designed to enhance the mechanical strength of Insulating Gloves and therefore increase their in service life.

Please note that Leather protectors have no electrical insulating properties of their own and must therefore be worn in conjunction with insulating gloves. All Leather Protectors meet or exceed the requirements of ASTM F696 and EN 388.

Sizing

Please remember that Leather Protector Gloves are designed to be worn over insulating gloves, you should order the same size leather protector as insulating glove. i.e. If you wear a size 10 insulating glove you should use a size 10 leather protector. As with insulating gloves size is a direct correlation with the circumference of your hand in inches.

It is always essential to ensure a gap between the cuff of the Leather Protector and the Insulating Glove of at least 1" (25.4mm) per voltage class of insulating glove. i.e. If you are using a class 2 insulating glove there should be a 2" gap, class 3 means 3" gap etc.

Arc Flash Protection

Having carried out independent testing to ASTM F1959-1999, we feel able to claim the following ATPV values (please note that ASTM 1959 is not a standard used to determine an ATPV on hand protection devices but as no such standard currently exists this appears to be the most suitable standard to use. For further information and clarification please contact Clydesdale);

Cowhide Leather Protector 27.1 cal/cm²
Goatskin Leather Protector 30.0 cal/cm²

Part No.	CLY 555 ILPG10**	CLY 555 07451 **	CLY 555 ILP3S **	CLY 555 ILP5G **	CLY 555 156-4 **	CLY 555 156-6 **
Material	Goatskin	Goatskin	Cowhide	Goatskin	Cowhide	
Overall Length	10" (254mm)				12" (305mm)	14" (355mm)
Suitable for Ins Gloves	Class 0 only	Class 0 and 1 only	All	All	All	All
Cuff	Standard	Hi Vis			Salcor Rubber	
Mechanism	No	Buckle Tie
