### DATASHEET: 451 18X150

### Swedish Pole Climbers

The most comfortable pole climbers available by far. These platform climbers are both comfortable and safe.

*Comfortable* because they are relatively lightweight and they allow you to work with both feet at the same level and in front of the pole. This way of standing makes a pole platform unnecessary because the shoes themselves act like one.

*Safe* because the load on the wearers back and legs is reduced which reduces the chances of injury.

The stainless steel arms are adjustable making it possible to use one size for a range of pole diameters (see table below). The footplates are adjustable to suit different shoe sizes (Euro 39-45). A full range of spare parts are also available.

The maximum load is 120 kg.

Instruction regarding annual inspection included.

| Part No.       | Pole Diameter | Weight (Pair) |
|----------------|---------------|---------------|
| CLY 451 180150 | 150-375mm     | 5.6kg         |
| CLY 451 181150 | 200-450mm     | 6.3kg         |

*\*All types of pole Climbers are not CE marked as they are classed as a climbing aid and not a piece of Personal Protective Equipment.*
