Powering the Future

DATASHEET: CLY 920 XXXX

ABC Come-along clamps

Clydesdale come-along clamps are available as either range taking or single size. Rather than having a multitude of Come Along Clamps for the various sizes of Aerial Bundle Conductor, the Clydesdale Range Taking 'ABC' Come Along Clamps are designed for use with a range of ABC. Zinc plated steel framework ensures strength whilst parallel moving aluminium jaws provide a sure grip on the cable preventing insulation damage. The zinc plating and aluminium mean the clamps are virtually maintenance free. Spring assisted pivot linkage ensures ease of use and positive positioning. The single size come along clamps are much the same as their range taking counterparts but with jaws specifically finished to match the Aerial Bundle Conductor size.
