

Clydesdale's Management attaches great importance to the formation of an environmental policy and meeting its requirements, with regard to products and services that may impact on the environment. Clydesdale has therefore adopted the requirements defined by international standard ISO14001:2015.

Clydesdale is committed to:

- Continually improve environmental performance and prevent pollution, where feasible, through process efficiency and improved technologies.
- Comply fully with all applicable legislative, regulatory, internal and other requirements which relate to identified environmental aspects.
- Evaluate environmental impacts and establish and review environmental objectives and targets annually.
- Reduce and recycle waste.
- Reduce resource use such as materials, fuel, water, energy.
- Education and guidance of all persons working for and on behalf of Clydesdale in relation to the environmental policy and related activities.
- Provide employees with the training needed to perform their duties in an environmentally conscious manner.
- Encouraging suppliers and sub-contractors to use Environmental Management Systems.
- Ensuring this policy is implemented, maintained and made available to the public.

We commit to review this policy yearly and publish the policy for all stakeholders to view.
