

CLYDESDALE

Powering the Future

DATASHEET: CLY 583 RBKP

Redback knee protection inserts

Redbacks Cushioning's® patented system uses a soft flexible leaf spring embedded within a honeycomb matrix to absorb and spread weight, The technology disperses pressure away from the body to provide unrivalled comfort and protection.

CE approved EN 14404:2004+A1:2010 Type 2 Level 1.

Specifications

- Soft rubberised materials offers 100% memory without loss of function.
- Abrasive resistant cover protects from objects penetrating the knee
- Curved to fit around the knee
- Shallow scoop at the base of knee pad to reduce pressure on lower leg
- Elevates knee to reduce pressure on leg, ankle and foot joints.
- Waterproof & washable (at 40°C)
- Each knee pad can support up to 450kg
- Fits knee-pocketed work trousers. Fits tight to avoid slippage
- Breathable to keep you cool and dry in hot and damp conditions
- Matrix protects knee from cold surfaces
- Honeycomb design to dissipate pressure
- Works by flex and not compression
- Designed for long term use
