Arc Flash Comfort Gloves

The Clydesdale Fabric Comfort Arc Flash glove has been designed to offer an alternative to the Insulating Glove / Leather protector combination.

It is constructed from a knitted Kevlar® fabric with a Neoprene® coating. The palm is made from Siliconised calf grain leather for added toughness and improved grip.

Excellent fit due to special glove cut

Good touch sensitivity due to soft leather glove palm

Breathable materials maximise wearing comfort

These gloves are not currently covered by EU arc flash testing standards. However, these gloves have been tested using the same method used for clothing and offer the following performance levels:

- EN61482-1-1, 32.8 cal/cm²(Palm) & 45 cal/cm²(Back of hand)
- EN61482-1-2, Class 2 (7kA, 0.5s)
- EN407
- EN388

Please note that this glove is not an insulating glove and does not carry a voltage class for live working.

Glove Sizing:

Clydesdale insulating gloves are available in sizes 8-12. Proper fit is important to determine glove size, measure the circumference around the palm (in inches).
