

# CLYDESDALE

## Powering the Future

### DATASHEET: CLY 581 025H

### Arc Resistant faceshield

This faceshield is tested to both European (GS-ET-29) and American (ASTM F2178) arc standards while being certified compliant with EN166 and CE marked to the latest EU PPE regulations.

The shield is supplied from Clydesdale with a suitable hard hat.

The transparent chin on this shield allows for better peripheral vision and improves visibility in low light conditions by allowing the maximum available light through to the wearer.

The latest grey shield offers excellent colour differentiation while still blocking all UV light and protecting the user from the effects of any other harmful arc emissions.

Part No.	Visor Colour	Arc rating (ASTM F2178)	Arc Class (GS-ET-29)
