CLYDESDALE
Powering the Future

# DATASHEET: CLY 930 K-3 & K-4 Ratchet Cutter up to 35 & 52mm

These reliable ratchet cutters are very easy to use. There is a simple ratchet action with a quick ratchet release tab to allow the blade to be pulled back from any position. A hole in the blade is also provided to facilitate pulling the blade back, a handy locking tab locks the handles together for storage purposes. The tool body is constructed from hardened steel. Sturdy black plastic handles are moulded for comfort and have limit guards to aid operation. The K-3 version is a one handed tool whilst the K-4 can be operated with one or two hands depending on the task. Both are for cutting of Aluminium or Copper conductor only. An alternative tool should be used for steel wire cutting.
