DATASHEET: CLY 370 OS45 Waveform Cable Sheath Stripping Plier

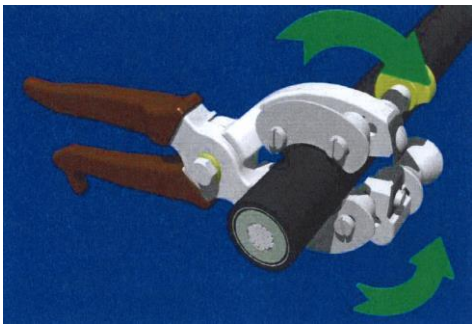

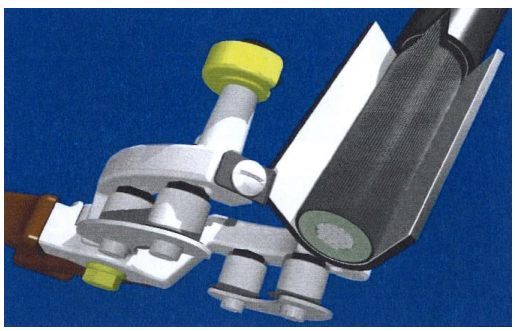

Part Number	CLY 370 OS45
Cable Diam	35 to 75mm
Length	310mm
Width	109mm
Height	104mm
Weight	840g

The CLY 370 OS45 Waveform Cable Sheath Stripping Pliers have been developed in conjunction with United Utilities for efficient sheath stripping of 95, 185 and 300mm² three and four core waveform cables with just one tool.

Stripping is done by first making two deep radial cuts in the sheath at the extremities of where the cable is to be stripped. Four circular cutting blades with 2.8mm pre-determined cut depths mean the tool only needs to be rotated through 90º to complete a full radial cut. Secondly, a longitudinal cut is made using the roller as a guide and a single circular blade, with 3.3mm set cut depth, from the one radial cut to the other. Thirdly, the sheath can then be peeled off using the tooth blade on the end of the pliers.
