Powering the Future

DATASHEET: CLY 370 PS Peelable Semi Conductor Stripping Tool

The PS tools allow simple and easy removal of peelable semi-conductor. The tool works by creating a precise spiral incision with an offset circular blade on the semi-conductor which allows it to be neatly unwrapped. The remaining length of exposed semi-con can be set depending on the tool used.

Part Number	Semi-Con Diameter	Length of Exposed Semi-Con Remaining	Weight
CLY 370 PS1440D1	14-40mm	30/40mm	630g
CLY 370 PS1440T1	14-40mm	30/40/45mm	660g
CLY 370 PS3860P1	38-60mm	30/40/45/55/60mm	900g
CLY 370 PS608030	60-80mm	30mm	1770g

To operate, set the semi con remaining exposed length using knob (1) and rule (2). (With the PS1440D1, flip the tool 180° to desired setting 30/40mm).

Fit the tool on the cable, tighten knurled nut (3) fully closed then release a quarter turn.

Rotate tool in direction indicated (4) until the tool stops against the jacket. Remove tool and peel away semi-con.
