

CLY 370 M23

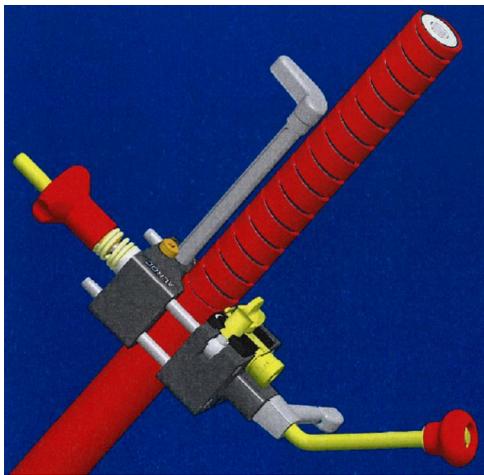

Dual Function Stripping Tools

Data Sheet

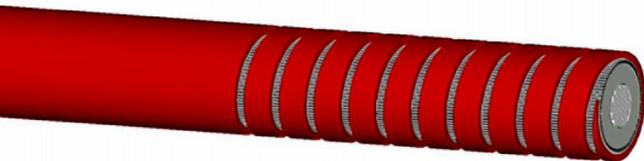

CLYDESDALE
Powering the Future

The CLY 370 M23 range of multi function stripping tools allow stripping of the cable sheath and insulation on cables with PE, PVC and PR outer sheathes. The tool functions by clamping around the cable with a specially shaped, precisely adjustable blade cutting the sheath or insulator at a set depth as the tool is rotated around the cable. This produces a neat, clean helicoidal cut.

Available in two sizes according to the required cable diameter range, the tool has an adjustable stop allowing sheath or insulation removal of a set length up to 115mm.
