

CLYDESDALE**Powering the Future****DATASHEET: CLY 350 MS100****Insulated Torque Wrenches**

The Clydesdale range of torque wrenches feature linear graduation with both metric and imperial units for accurate setting of the required torque. The aluminium alloy body provides an extremely light but robust tool designed for use in conjunction with our range of enlargers, reducers and sockets. Once the torque is set, the tool will automatically reset ready for the next nut or bolt. Torque wrenches are supplied with manufacturer's calibration certificate and are compliant with EN 60900, ESI 26-3, VDE 0680 and NFC 18-400 guaranteeing insulation up to 1000V.
