

DATASHEET: CLY 353 MC45XL

Insulating Cable Cutter

These cutters are specifically created for any low voltage operation in confined spaces where the short circuit risk can lead to serious consequences for both staff and equipment.

Cutters made of glass fibre-reinforced thermoplastic insulating material.

Specially designed blade shaped to avoid cable damage.

Hybrid construction: reduces risk of short circuits.

The only conductive part is the cutting blade.

D-ring for working at height.

Designed for use with gloves.

Soft handle for ease of use without damage to gloves.

EN 60900 / IEC 60900 compliant

IEC 2823/03

Part Number	CLY 353 MC45XL
Max Jaw Opening	16mm
Max Copper Cable	25mm ²
Max. Aluminium Cable	70mm ²
Length	187mm
Weight	250g
