

As recommended within both the EN and ASTM standards, good storage of Insulating Gloves and sleeves is essential to ensure that their insulating properties are maintained. Folds and creases strain rubber and ozone exposure causes cracking.

Clydesdale Glove and protector Bags are made from a heavy duty fabric with bound edges and heavy duty closure studs. They feature a ventilated side so that damp or sweaty gloves can dry naturally. They feature a metal hook for hanging the bags in workplaces or on work harnesses.

Glove bags feature an additional front pocket to ensure protectors are kept separately from but safely with insulating gloves between jobs

Part No.	To suit
CLY 420 GB-112P	11-12" insulating glove + protectors
CLY 420 GB-114P	14" insulating glove + protectors
CLY 420 GB-116P	16" insulating glove + protectors
CLY 420 GB-118P	18" insulating glove+ protectors
CLY 420 SB	Insulating sleeves
CLY 420 SB-P	Insulating sleeves and gloves
