

DATASHEET: CLY 110 070

Voltage Detector + Torch

A non-contact voltage (NCV) detector and flash light which is CAT IV – 1000V rated, electrically insulated and designed to reliably detect voltages on tamper proof outlets and electrical systems.

Specifications

- The detector has a vibration and red LED alarm that alerts the user to the presence of voltage in noisy areas.
- Versatile high/low sensitivity modes that detect voltage on industrial equipment and low-voltage installations.
- Built in Powerful LED work light always at the ready to illuminate poorly lit locations.
- Inspection light at the probe tip facilitates testing in dark areas.
- Long run time with power saving low battery indication and auto power off.

Part No.	Voltage Range	Frequency Range
CLY 110 070	24 – 1000VAC	45 – 65Hz
