

CLYDESDALE

Powering the Future

CLY 305 4744

Voltage detector - : 4.2 / 15 / 25 / 35 / 46 / 69kV

WARNING

Do not assume conductors that have been tested de-energized will stay de-energized. Always install proper grounding devices before working. Failure to do so may result in serious injury or death.

Self-Testing Voltage Detectors are used to verify live or de-energized conductors. These testers may be used with rubber insulating gloves or hot sticks using the splined universal end fitting. Testers indicate the presence of voltage with an extra bright LED light and a distinctive audible signal. It is recommended that the tester be moved closer to the conductor until a warning is indicated, or it touches the conductor, apparatus, or elbow test point. Each tester requires three "C" batteries (included).

CLY 305 4744 Voltage detector only

Ranges: Off / 240V (test)/4.2kV/15kV/25kV/35kV/46kV/69kV

Dimensions: 280mm x 89mm

Weight 430g

CLY 305 4769 Complete kit (includes above detector)

4315 Storage Case

Dimensions: 305mm x 203mm x 114mm

Weight: 450g

2500 Shotgun Adapter

Weight 200g
