

CLYDESDALE**Powering the Future****DATASHEET: CLY 971 R*330****Roll Blanket Shroud**

Produced in the USA for Clydesdale, these rolls are ideal for use by either linesmen, jointers or fitters who need to shroud a multitude of different appliances. The shroud is delivered on a cardboard tube in a neat box, along the lines of a domestic cling film, this allows quick access to the shroud which is then cut to the desired size with a knife or scissors. Available in two classes for use up to 1000V (Yellow) or 7.5kV (Yellow/Orange).

The cut lengths can be used again. The material used is a special combination of elastomers giving excellent protection against ozone and UV degradation. The shroud is strong, flexible and yet easy to cut without tearing. Conforms to ASTM D1048 with edging modifications.

Part No.	Class	Voltage Use	Dimensions	Velcro Applied	Comment
CLY 971 R0330	0	1,000V	3' x 30'	No	Roll
CLY 971 R1330	1	7,500V	3' x 30'	No	Roll
