

DATASHEET: CLY 214 1976

ABC Earth Tap Assembly

Clydesdale's ABC earthing kit provides a robust, reliable and easy to install ABC (Aerial Bundled Conductor) earth tap allowing the installation of existing low voltage, overhead line shorting earths.

Constructed from high quality materials to provide maximum life in-service.

- Solid Stainless steel core for maximum corrosion resistance.
- Over moulded rubber insulation on main body – 1000v.
- Removable rubber boot for attaching earth – 1000v.
- Installed onto ABC using conventional IPC (Insulation Piercing Connector).
- 1.5mm diameter nylon lanyard to prevent loss of boot with working, usable length 360mm.

All-black construction minimises visual impact of device when installed in residential areas.
