Mini Winch

The Mini Winch is a small portable winch for running pilot ropes or small cables through the duct. The winch is placed on top of the manhole and the rope is pulled with the capstan wheel. The engine is a reliable 4-stroke petrol engine. Lightweight construction makes it possible for one person to handle the winch.

The winch is supplied as a Honda 2HP 4-stroke engine, gearbox, and capstan wheel attached to manhole frame.

Pulling Force:	150kg
Max Speed:	50m/min
Engine:	Honda 2HP 4-Stroke
Size:	640 x 640 x 370mm
Weight:	21kg
Capstan:	Aluminium, min diam 100mm

The mini winch can be made to fit different kind of man hole openings.
