

PPE Regulation compliance

Product already in the supply chain

From the 21st of April 2019 the EU PPE Directive ceases to be law in Europe.

It is replaced by the EU PPE Regulation.

Under the Transitional Provisions in Article 47 of the new PPE Regulation it is legitimate to continue to sell PPE products that were already placed on the market at this date.

The PPE products in this order were in our stock under the previous PPE directive at this cut-off date.

Clydesdale's products range is PPE Regulation compliant and will begin to show the correct details as new production comes through.

PPE that this document applies too:

- Clydesdale NOAH range of arc flash PPE including balaclava
- Preising arc flash hoods
- Salisbury by Honeywell arc flash face and head protection range
- Salisbury by Honeywell arc flash garments
- Salisbury by Honeywell insulating gloves and sleeves
- Novax insulating gloves
- Novax leather protector gloves
- Sibille safe insulating gloves
- North safety hard hats
- Other ancillary PPE obtained to suit specific customer needs

Please see our website www.clydesdale.net/PPER-compliance for more details
